

## **Telangana is well managed- Intelligence report**

Telangana is 'managed' very well, according to intelligence sources, few days back in times of India, and a TV show on the telangana issue clearly tells that 'There is no telangana', in connection with Bengal, partition fear is also picking up there and Congress doesn't want to miss Bengal this time. Well, for time being, one can think that it's all Media's version against telangana..but interestingly the facts are matching the ground realities. It reveals that TRS is managed by Congress, and TRS is in turn managing JAC..poor Nagam is oppressed by the state in support of Errabelli, Revanth etc etc..through TDP. Jagan is slowly entering into the Telangana. We have already seen that, all Seema Andhra parties, capitalists, including rich sections of telangana , media come together to stop telangana. Our selfish leaders are giving them full support. Purandheswari's visit is also part of this programme, it says. Now, all sections in telangana are keeping quite, they can take this matter upto 2014. Sonia Gandhi , joining hands with Seema Andhra will try her best to drag it till his son Rahul Gandhi become PM .

The simple answer, logical conclusion is telangana never comes without agitation, only agitation makes them to think, act etc. If any movement is dragged, brought forward this kind of 'stagnation' is bound to happen. Now the total programme is again depends on JAC, we are all seeing , experienced already that none of the JAC programmes are effective, except million March, we have seen that episode also, people forced it to happen. Dharnas, rasta rokos, hunger strikes are just time pass programmes, many people lost interest on them. It may sustain movement but will not bring pressure on either central or state govts. Seminars and workshops are plenty, even padayatras, Bus yatras, Shava Yatras.. are also done by all the sections. JAC independently should think of taking programmes which will stall all the operations, communication and administration. Other side, people should bring pressure on all political party leaders to resign and join hands in agitation. This should happen simultaneously..employees also must play crucial role. JAC should include rural sections, motivate raitu, kooli sanghalu, labour unions , caste organisations to take up the agitation.

What 'we' have to do..well , we must not be blind to the REAL situation, we, including NRIs should not take sides till we get telangana. We all love some leaders and some parties, If they don't perform well, like teachers we must correct them. If they fail to do so, it's not their mistake, it's ours. Let's not forget 600 souls, and another crores of people's aspirations, years of struggle, sacrifices..

Telangana is not just ten district, it's the dignity and self respect, it's also self rule..It's our birth right. Let's come together and fight.

Jai Telangana!

Sujatha Surepally.
