

Purpose of our movement

I came to know that Purandhareswari, a central minister & samaiyandhra ideologue was welcomed and hosted by TRS leaders yesterday at Karimnagar. This becomes an important issue because [as was reported] she was pushing for 2nd src report in the process of telangana formation. As a daughter of NTR & as a congress leader we all know her [gopi] stand on Telangana. Then why some TRS leaders were entertaining her when she came to inaugurate a kendriya vidyalayam in karimnagar? How can Rajendergaru, a trs leader ignore the protests of his own party colleague's & telanganavadulu at the meeting premise? Why karimnagar is becoming more and more a 'balapradarshana' veedika? I think TRS leaders whoever hanging around with Purandhareswari yesterday are answerable to these concerns of many Telanganites..

I am aware that It is quite an intellectual bankruptcy to equate Telangana movement with TRS or its leaders. Same way it is even more destructive act to talk only about all parties' leaders & their cheap political tricks extensively [while ignoring the effective dimensions of the T. movement] which is what happening every day & night on Tv screen, news papers & even in some discussion groups [at the Iraq war time US media used such mass hypnosis technique]. We are all now witnessing how Telangana movement is portrayed as quarrel between political leaders; how telangana peoples aspirations are replaced by & limited to a detailed report of 'tiTla' puranam amongst politikal leaders. Now telangana perspective has brought down to "tiTla puranam". Every one of us have our share in such a degradation of the movement.

If we recall last year movement days, we see how our people were questioning the leaders for their misdeeds; how we were all working collectively to explore a new political culture. We also remember how [through peaceful means] Telangana people made all the leaders accountable to their deeds. Irrespective of party, all the political leaders were forced to obey the telangana peoples' will then. But Now! It is a totally different picture; A picture all ruling forces wish to see [ie 'paggalu prajala cheetullo kaadu, naayakula cheetullo']. In the awe of bringing 'paggalu' into 'naayakula cheetulooki' the so called udyama party of Telangana and even political jac also contributed its share in such a fall. The result is All the leaders are busy to justify his/her self interests. Sponsored media is at their service.

But I am confident-For Telangana jacs are all still alive to put a check on such organised distortions. Coming back to the yesterdays Central ministers' visit, It seems her visit was intended by congress to test the Telangana waters before jumping. Or perhaps the whole event was designed to show that Telangana political & peoples jacs have no regulatory role on trs leaders. This is an alarming situation. I think now all jacs including student & advocates jacs have much more responsibility than before in fixing such t. politikal trends. As vimalakka, an organic leader of Telangana says "now all jacs must connect each other & should work collectively"; our task now is to rejuvenate our energies and work collectively. Most importantly, Political jac must shed its elitism and work closely with such peoples' jacs. Finally all the Telangana leaders should never forget that "the sole purpose of our movement is not to seize power on behalf of the people rather it is to create a space in which people can define their own power". Let's hope TRS leaders will introspect their actions in the light of this true purpose of our movement. Let's create a new political culture.
